

# Supporting early stage technology companies

At Grant Thornton, we occupy a unique position in the market. Our global scale and multi-disciplinary team means we can deliver on the technical requirements early stage businesses need, whilst being agile and personal in the way in which we deliver.

Our multi-disciplinary technology, media and telecommunications (TMT) team, support technology businesses through all stages of their growth journey from Seed / Series A through to IPO or exit.

We understand the TMT space and the key issues businesses face as they grow. Along the journey we bring ideas to the table, going beyond technical issues, to recommend ways to make your business even better.

Our position as a specialist technology advisor is evident: we are proud to be the no.1 auditor of AIM Listed technology businesses by number of clients we act for and we are the leading M&A advisor in the technology sector.

As a team we have a strong network across the technology ecosystem in East Anglia, throughout the UK and around the world. This means we can quickly and efficiently deliver cross border advice where and when you need. In East Anglia we work with a broad range of technology businesses, from scale ups to publicly listed businesses.

You can view our latest technology insights at [www.grantthornton.co.uk/tmt](http://www.grantthornton.co.uk/tmt)

## Unique planning

We can support you to develop a growth plan that's unique to you, addressing your specific growth challenges.
