

The most exciting and ambitious tech companies in the East of England.

www.techeast.com/te100

Showcasing the East

We celebrate success, innovation and good practice wherever we find it. We shine a light on startups, scaleups and late-stage businesses who are leading the way. We join the dots to demonstrate the strength of the region-wide cluster

Amplifying the voice of tech business

Digital businesses make a significant contribution to the UK economy. Wherever there is an unmet need for talent & skills, investment & funding, tailored business support or business infrastructure we call it out and influence government and business to fix it.

Bridging gaps in the ecosystem

Wherever there is a broken link between the needs of tech businesses and the support offered externally we forge stronger connections and build bridges. Whether between skills providers and businesses seeking talent to grow or investors and businesses looking for capital to scale, Tech East provides the 'glue'.

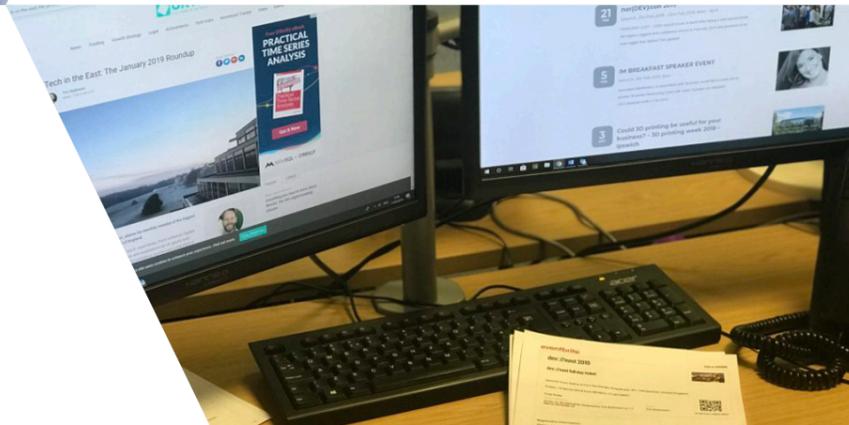

Partnering with coworking spaces, incubators and accelerators

We have partnerships with some of the best physical hubs in the region. We enable members to seamlessly build a regional network and leverage workspace and support in the whole 'tech diamond' of Norfolk, Suffolk, Essex, Cambridgeshire and London.

Curating the most relevant content

We produce and select the best available data, insights and events for ambitious tech entrepreneurs, investors and those organisations wishing to support the sector. Never miss an event. Always have the right research.

What is Tech East?

Shining a spotlight on the Tech East 100

'Tech East 100' shines a spotlight on leading-edge tech businesses located in Norfolk and Suffolk to support their growth ambitions.

The programme is led by Tech East and backed by Suffolk and Norfolk local authorities, New Anglia Local Enterprise Partnership, BT and an impressive list of local sponsors.

Our tech community here in the East is diverse and broad ranging and Tech East 100 reflects this. We asked our judges to identify: our most exciting start-ups; scale ups with high growth potential; established national leaders and companies securing significant investment successes. We wanted to recognise local businesses pioneering new technologies or carving out new market niches; community players creating jobs for our local economy; innovative organisations creating new products and services to help make the world a better place.

Tech East works to help businesses and our tech community to thrive, to create new jobs and to attract and retain tech talent here in our region. It supports tech companies to develop new market opportunities and to raise their profile with customers, partners and potential investors both at home and overseas. It is our ambition to build the reputation of Norfolk and Suffolk as 'the' place for tech companies to do business.

Lisa Perkins
Chair of Tech East and Adastral Park and
Research Realisation Director

The 100 businesses were selected from a longlist of nearly 200 by our panel of industry experts using a scoring mechanism. It was a tough process to whittle down to the final 100 and Tech East is grateful to our expert panel for generously giving their time and knowledge.
