

TRANSFORM YOUR APPROACH TO PROJECT MANAGEMENT

Gain the world's leading certification in Agile Project Management (AgilePM®) and become a Practitioner in just 4 days.

This course will enable you to successfully combine Agile techniques with more traditional governance methodologies, such as PRINCE2® and PMI®. Understanding these different project management styles will help tailor your approach and adapt to the changing business environment.

Ideal for both project managers and others involved in project management, and especially useful for anyone in engineering and information technology development for software projects and product or application development.

AgilePM® Combined Foundation & Practitioner
14-17 February 2022 • £574 (with ESF funding)
