

## AMS Talent Lab - Norfolk / Suffolk Skills for Life Bootcamps

**A unique opportunity to engage with future talent and create a learning and development environment**

AT AMS Talent Lab, we are proud to announce that because of the success that we have achieved in delivering our Skills for Life bootcamps across the region in 2024 we can offer you access to our learners that have completed our recent Cyber Security and Project Management skills for life bootcamps.

Our learners have undertaken their respective 12-week bootcamp course where they have developed a strong mix of technical and transferrable skills and insights via our market leading training providers, whilst also working with their appointed AMS Career coaches to recognise and develop **soft skills** to ensuring they are career ready.

As the scheme is Govt Funded we can give businesses the opportunity to engage with our Talent pool of learners with no **COST** or **Commitment** attached with added benefit of an appointed AMS Talent Lab representative to ensure the process moves smoothly.

If you have identified potential growth demands or skills gaps for 2025 and beyond where these learners could prove to be a valuable source of future talent, we would love to hear from you!
